

## Web development Internship : Assignment

**Task:** Paint Product Comparison page

### Description:

Painting is literally the last step of getting homes painted. There is a lot of interesting choices and decisions to be made. The first step while planning painting project is usually choosing the right paint product. With so many ads and brands conflicting in their minds, it isn't an easy task. Product specification, its features, price are the key things that affect paint product selection.

In this task, you will be creating responsive web page, optimized for speed and user experience for comparison of 2 or more paint products. You can refer [this](#) for basic product listing page. You need to develop Add to compare feature on this page and create a Comparison Page where in the user selection will be compared on the following heads:

- Basic Details – Name, Product Type, Make (Brand), Description
- Product Finish – Type, Description, Coverage
- Price Info – Availability (Packs), Price for each
- Key Features – Rating on Washability, Eco Friendly and other such properties
- Best For – Living Room/Kitchen etc

Objective is to help users take informed decisions. Keeping in mind functionality and user experience as priority, you are free to add any feature (Product Rating/Review/Mark as favourite etc).

For understanding of the functionality of this page, equate paints to any product you'd wish to buy online.

### Advanced:

Develop a feature to Download Comparison Sheet as PDF and Email it to the User.

*This is not mandatory for submission. But, why not give it a shot!*

### Submission:

Last Date for Submission is: 31<sup>st</sup> Dec 2015

Technologies: HTML, CSS, JS, PHP, Open source framework, templates (Do mention details – name/source) anything you're comfortable with.

Please provide the source code and screenshots of all pages created.

Also, briefly describe your work and highlight key features.

Email your files as zip to [anupam@aapkapainter.com](mailto:anupam@aapkapainter.com)
